### Request for Certificate of Correction

Date: 2003, March 14, Fri

Hon. Commissioner for Patents  
Washington, District of Columbia 20231

Sir:

1. The above patent contains significant error, as indicated on the attached Certificate of Correction form. These errors arose at the respective places in the application file indicated below:

- ☐ 2. Most of these errors arose through the fault of the PTO or the GPO.
- ☐ 2. Few errors arose through the fault of the applicant. A payment form by credit card for \$ 100.00 for the fee is however placed at end of the document. Such errors, which arose in the claims and the specification, are of a clerical of minor nature, but could lead to confusion. They occurred in good faith and therefore issuance of the Certificate of Correction is respectfully requested.
- 4. Specifically on line 1 of claim 5, applicant erroneously typed "2" as a claim reference and neither applicant nor the Examiner detected this error during

MAR 26 2003

prosecution. It is clear that claim 5 can only refer to claim 4, for it develops from 4 arms, which claim 2 does not contain.

On line 4 of claim 5, applicant erroneously forgot to type a hyphen between "helping" and "hand"; in the Merriam Webster dictionary, "helping hand" has a different meaning than "helping-hand", which is a tool.

On line 1 of claim 6, applicant erroneously forgot to type a comma between "comprising" and "in addition";

On line 4 of claim 6, applicant erroneously forgot to type a hyphen between "helping" and "hand"; in the Merriam Webster dictionary, "helping hand" has a different meaning than "helping-hand", which is a tool.

On line 8 of claim 18, applicant erroneously forgot to type a colon after "the steps of".

On Column 5, at the end of line 50, on Column 5, line 65, and on Column 7, at the beginning of line 36, applicant erroneously and exceptionally typed "parts" instead of "arms" after "movable" to the opposite of what is typed elsewhere in the specification, before and after these lines.

On Column 5, line 5 of the specification, applicant erroneously typed 'come' instead of 'comes'.

On Column 11, at the end of line 47 of the specification, applicant erroneously typed a period instead of a comma.

Errors arisen through the fault of the PTO or the GPO came principally because penultimate substitute specification was used instead of the last substitute specification that Examiner accepted on 10/28/02. They arose also because some omissions, including a big one (column 1, line 62), and some mistranscriptions, were made in the specification. There is also a surprising difference between the "Parent Case Text" shown Column 1, lines 6-8, and the "Related U.S. Application Data" such as printed in the deed. In the "Parent Case Text", just after "abandoned" is missing --, which is a continuation of Ser. No. 07/938,211, filed Sept. 3, 1992, now abandoned, --. It might be also wondered whether -- on Sept. 3, 1992, as the National Stage of -- should not replace "as" in the "Related U.S. Application Data" section of the deed, line 3.

And as the Merriam-Webster and the American Heritage Dictionaries only grant a meaning to "objets d'art" and not to "objects d'art", it is recommended to revert to "objets d'art" from the interesting initiative of the PTO or the GPO to turn it into "objects d'art".

Above and in the certificate of correction, patentee made his best to give the correct line number where the correction is to be made. This number has been counted from the beginning of the column when it was clear that the multiples of 5 printed were not representing the real number of line aside them.

Patent No.: 6,505,391 B1

It is also suggested to replace FIG. 5 with FIG. 2, FIG. 3 or FIG. 4 for illustrating the abstract, because FIG. 5 shows additional components that are not enumerated in the abstract.

Very respectfully submitted,

*Philippe* BERNA
